THE STORY

Three creatures emerge from one cinematic world. Mystery gives way to pursuit and an electrifying creation.

01

Hypnotic mystery

An imposing house glows within a blood-red landscape. Suspended poses and deliberate approaches introduce an elegant, unsettling presence.

Use the castle as the visual anchor; frame entrances with silhouettes and concealed reveals.

02

Moonlit pursuit

The full moon takes command. Curved pathways give way to sudden directional changes, pack formations and an urgent chase.

Echo claw marks through angular gestures and sharp changes of facing.

03

The final fright

Green lightning fills the sky as a forbidden experiment reaches its climax. Fragmented motion assembles into a powerful, unified final creation.

Build from isolated impulses to full-ensemble motion, ending in a strong reveal.

Movement and staging suggestions may be refined with the production team. Repertoire is listed on page 1; exact musical placement should follow the final score.
